SITUATION SUMMARY

Magnitude 6.0 Earthquake, American Canyon, Napa County

SITUATION UPDATE:

On Sunday, August 24, 2014, at 0320 Hours PST, a magnitude 6.0 earthquake struck five miles northwest of American Canyon, CA. The earthquake nucleated at a depth of 10.8km. The shaking intensity in American Canyon and Napa from the “South Napa Earthquake” was a “VII” on the Modified Mercalli Scale, suggesting very strong shaking occurred in the Napa County area. Ground shaking was felt as far south as Salinas, east to Sacramento, and north to Ukiah. USGS estimates that aftershocks should be expected for the next week.

Aftershocks

- There have been 94 aftershocks, four of which are M3.0 or greater (8/27/2014 at 0830 Hours; Source: USGS).
- **STRONG AFTERSHOCKS (Magnitude 5 and larger):** At this time (3 days after the mainshock) the probability of a strong and possibly damaging aftershock in the next 7 days is approximately 11%.
- **EARTHQUAKES LARGER THAN THE MAINSHOCK:** Most likely, the recent mainshock will be the largest in the sequence. However, there is a small chance (approximately 2%) of an earthquake equal to or larger than this mainshock in the next 7 days.
- **WEAK AFTERSHOCKS (Magnitude 3 to 5):** In addition, approximately 1 to 10 small aftershocks are expected in the same 7 day period and may be felt locally. The Cal OES Earthquake and Tsunami Duty Officer is in contact with the United States Geological Survey and California Geological Survey and will provide updates as new information becomes available.

Area Weather Forecast

Quiet weather is expected across the San Francisco and Monterey Bay Region all work week.

- Currently have a slight chance of rain for the weekend.
- Highs will be in the 60's and 70's at the coast with 80's to mid-90's inland for most cities.
- Friday and Saturday temperatures in the lower 100's are possible for far southern and interior regions.

Access and Functional Needs

- On 8/25/14, Crosswalk Community Church received 18 residents overnight.
- A FAST team is now on site (an additional FAST team may be deployed if needed).
- The American Red Cross will continue damage assessments and FAST team coordination.

Tribal Affairs

- Per the Cal OES Tribal Liaison, no damages have been reported for: Cloverdale Rancheria in Cloverdale, Stewarts Point Rancheria in Santa Rosa, and Lytton Rancheria in Santa Rosa.
- Building inspections are being completed at Graton Rancheria in Rohnert Park. Information to follow.
- The Tribal Office is still trying to make contact with Dry Creek Rancheria in Geyerville and Middletown Rancheria

Potential Minor Coastal Flooding, Coastal Counties (No Change)

A large swell generated by Hurricane Marie will bring the threat of large surf, rip currents, and minor flooding to low lying areas of coastal Orange and northern coastal San Diego counties through Thursday, 8/28/14.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

ACTIVE WEATHER WARNINGS, WATCHES and ADVISORIES:

- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

An upper level ridge will remain over the West Coast through Thursday resulting in slightly above normal temperatures across the interior and dry conditions. Temperatures will begin trending downward on Friday as the ridge moves inland and is replaced by an upper level trough.

San Francisco Weather:

No significant change is expected in the weather conditions through the end of the week as an upper level ridge of high pressure remains over California. Some upper level moisture from the remnants of now rapidly weakening Hurricane Marie will likely move through late Friday to Saturday, but with no more impact than some mid and high level cloudiness. Otherwise seasonally typical weather conditions are expected to prevail through the end of the forecast period.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

High pressure will bring a slight warming trend the next couple of days, followed by a weak trough by this weekend bringing increasing high clouds and cooler temperatures.

Hanford Weather:

Dry weather and warmer temperatures can be expected across the Central California interior today through Saturday as an upper level ridge of high pressure dominates the pattern. The second half of the Labor Day weekend will trend slightly cooler as an upper level trough of low pressure settles into the Great Basin.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

A warming trend will continue through the end of the week as high pressure continues to build. A broad trough of low pressure will develop over the western United States over the weekend, likely bringing a return of near normal temperatures and an increase in marine layer cloud coverage for early next week.

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

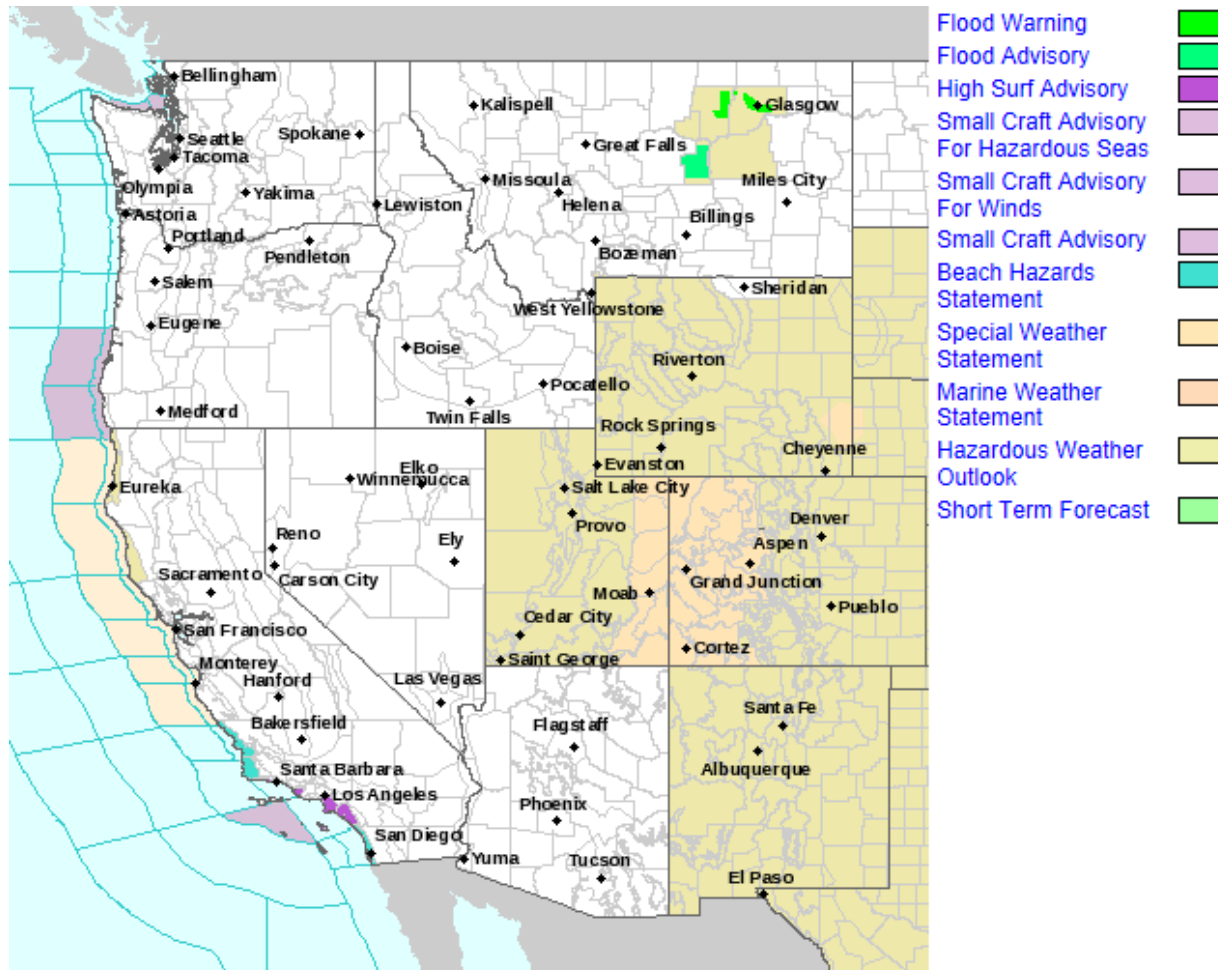

A large south swell generated by Hurricane Marie will bring large, dangerous surf and strong rip currents to Orange County and northern San Diego County through Thursday. High pressure over California will bring warming to slightly above average through Friday then slowly cooler into early next week as a trough of low pressure moves inland to the north bringing stronger onshore flow and slight deepening of the marine layer. Night and morning low clouds and fog will be exceedingly patchy the next few nights with somewhat greater coverage for the weekend into early next week.

Southeast California Weather:

A drier and warmer stretch of weather will take over lasting at least through the weekend. High temperatures will climb back to near normal by Thursday peaking on Friday and Saturday with some lower desert spots approaching 110 degrees across southeast California.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 21st : Don Pedro 41%; Exchequer 17%; Folsom Lake 40%; Lake Oroville 32%; Millerton Lake 46%; New Melones 24%; Pine Flat 11%; San Luis 19%; Lake Shasta 31%; Trinity Lake 30%; Pyramid Lake 94%; and Castaic Lake 44%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)

Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water¹ to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.

http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_regulations_waterconservation.shtml

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.

- Cal OES continues to gather drought-related costs from state agencies and local governments.
